Attachments: Perfluorinated Compounds November 2017.pdf

Dear Dr. Stapleton and Dr. Strynar,

As promised, here is a copy of the recent test results for the perfluorinated compounds analysis performed by Eurofins Eaton Analytical.

Take care,
Rachel

Good morning, Heather and Mark,

Thank you so much for sharing your comments on our fact sheet. We will of course respect your wishes to remain unlisted contributors. We will be adding information about PFAS, and unregulated contaminants generally, to the Town's website in the near future.

We have begun a monitoring program to gain a more detailed understanding of PFAS levels in our water; this will help inform future treatment planning and design. I will be glad to share more information with you as it becomes available.

I appreciated the NYT article and found it a very interesting read.

Sincerely,

E. Alexandra Jones, P.E.

Water System Manager
Utilities – Town of CARY

Hello Rachel-

Thank you for sharing the fact sheet with us. Mark and I have made some suggested comments and edits in the attached document. Hopefully you can use these comments in finalizing the document for the Town of Cary.

And just a note- we (and Mark in particular) would prefer not to be listed as contributors to this fact sheet; we're primarily interested in making sure it's factually correct and transparent.

Please let us know if you have any questions about our suggested edits,

thank you again for meeting with us,
Heather

Hi Rachel and Alex-

Thank you for meeting with us this morning, we really appreciate your time and interest. As promised, I'm sending you both a copy of the slides we presented this morning (see attached).

And here is a link to an article published in the NY Times last year about PFOA and a specific study investigating high exposures near a DuPont facility in West Virginia. It's an interesting read:

<https://www.nytimes.com/2016/01/10/magazine/the-lawyer-who-became-duponts-worst-nightmare.html>

I've copied Dr. Strynar on this email; he has some references that he will share with you. If possible, could you also email us a Word copy of the fact sheet you shared with us this morning? We would both be happy to provide some comments, and it would be easier to do with the track changes feature on Word.

Thanks again, and I look forward to hearing about the results from the recent water testing,

Heather

Heather,

We wanted to let you know that we collected the samples today from the raw water, finished water, your home and a nearby sampling station. Alexandra Jones and I are available to meet with you on Monday the 27th at 10 am at our water treatment facility (1400 Wimberly Rd. in Apex) if that works for you. You may need to announce your arrival at the front gate, and then enter the main building near the flagpoles.

Thank you,
Rachel

Hi Rachel-

Unfortunately I teach in the afternoons and can't make that time. My availability in November is listed below- please let me know if any of these times/dates would work for you and your manager.

Also- my address Ex. 6 Personal Privacy (PP) Please feel free to stop by any time to collect a water sample from the spigot- we have one on each side of the house.

Availability:

11/21: 9-11am

11/27: 9-11:30am

11/28: 9-11:30am

11/30: 2-5pm

regards,

Heather
